

PRAVIND THAKUR

Product Specialist | Techno-Functional Business Analyst | Corporate Actions

[linkedin.com/in/pravindthakur](https://www.linkedin.com/in/pravindthakur)

Summary

Gurugram, Haryana, India

Over 9 years of experience in TCS BaNCS Financial Services, specializing in Corporate Actions, Securities Processing, SWIFT Messaging and Reference Data Setup. Experienced in Requirements Analysis, Interface Design, Development, Performance Optimization, UAT and Production Support. Currently engaged in a client-facing role from past 6 years supporting global financial institutions across APAC, EMEA, NAM and LATAM region.

Developer → Technical Lead → UAT & Production Support Analyst → Business Analyst → Product Specialist

Experience & Client Engagements

Tata Consultancy Services (TCS)

Jan 2017 – Present

Citibank, N.A. / Societe Generale / Wells Fargo / Northern Trust Bank

Global Financial Institutions

- Started as a **Developer** working on application development, interface development, log analysis and defect fixing.
- Progressed to **Technical Lead** for team management, interface Design, application enhancements, performance improvements, log analysis, code reviews and production issue resolution using Java, Oracle SQL, AWR and JProfiler.
- Transitioned to **UAT Support Analyst**, coordinating with Development and QA teams for test-data preparation, defect analysis and release validation.
- Parallely evolved as a **Production Support Analyst**, handling production release, production monitoring, incident management and root-cause analysis.
- Managed **TCS BaNCS Configuration & Reference Data**, including Entity and Product Setup, Security Master and Reference Data, Business Rules, Static Data, Holiday and Calendar Configuration, Tax Board and Tax Reporting Matrix, Business Partner, Security Account, Document, Depot Account, Nostro and Cash Account, Notification and Standing Instructions and securities processing configuration.
- Advanced to **Business Analyst**, gathering and analyzing requirements, preparing functional and technical specifications, and acting as a techno-functional bridge between clients, business users, development, QA, infrastructure and operations teams.
- Promoted to **Product Specialist**, to provide functional and technical expertise across the end-to-end **TCS BaNCS Corporate Actions** lifecycle, including event announcement, entitlement calculation, payment processing, client notifications and tax reporting for events. Support **ISO 20022 SWIFT MT564/MT565/MT566** and up and downstream (EMC, SMI, GSM, SECORE, FLEXCUBE, CPE, Data Warehousing and Lake) processing.

Skills

- Corporate Actions:** MAND, VOLU, CHOS and Multi-stage Corporate Action Event Lifecycles, SWIFT Messaging (MT564, MT565, MT566, MT567)
- Trade Clearing & Settlement:** RFP, RVP, DFP and DVP Trade Types and respective Trade Lifecycles
- Reference Data Management:**
Security Master (ISIN, CUSIP, SEDOL, Exchange details and other Security attributes)
Business Partner (Address, Vostro and Nostro Security Account, Cash Account, Standing Instruction, Notification)
- Business Analysis:** Requirement Gathering, Functional & Technical Analysis, Business Process Analysis. Preparation of Interface Specification Document (ISD), Functional Specification Document (FSD) & Business Requirements Document (BRD)
- UAT & Testing:** UAT Planning, Requirement Validation, Test Scenario Design, Defect Management, Regression Testing, Test Data Preparation, Release Validation, Stakeholder Management & Coordination, Sign-off Support
- Production Support:** L2/L3 Support, Incident Management, RCA, Production Monitoring, Application Log Analysis, Performance Analysis & Optimization, Release Support, Defect Management
- Technical:** Java, Java Script, HTML, JSP, Oracle SQL, PL/SQL, SQL Reporting, Linux/UNIX, Shell Scripting, VBScript, Kafka, JSON, XML, XSD, Oracle AWR, JProfiler, Multithreading, Interface Design, STP Process Design, Batch Process Design
- Tools & Utilities:** Kafka, Git, SVN, JIRA, ServiceNow, Eclipse, SQL Developer, Confluence, Beyond Compare, Notepad++, Excel & VBA/Macros, PowerPoint, PuTTY, WinSCP, Oracle AWR, JProfiler, ChatGPT, Microsoft Copilot

Achievements

- Optimized** reference-data processing for **16 million reference data**, achieving up to **100× faster processing** and **90% reduction in processing time** by converting batch processes to **STP NAP (Non-Asynchronous Processing)** for parallel processing while maintaining the required sequence of dependent processes.
- Designed and developed end-to-end GDPR archival solution**, covering static and transactional data, with configurable screens for archival rules and data viewing, and a **batch-to-NAP processing framework** to identify and archive eligible data to a separate database based on configured criteria, including completed event lifecycles and closed accounts.
- Improved high-volume data processing** by optimizing SQL queries, analyzing **AWR and JProfiler reports**, redesigning interfaces, and implementing failure reporting and targeted data-correction processes for **Security Master and reference-data loads**, reducing application processing time by **83%, from 12 hours to 2 hours**, while enabling selective correction and reprocessing of failed records.
- Built a PowerPoint-focused YouTube channel to **35K+ subscribers with 300+ videos**.

Education

Bachelor of Technology (B.Tech.) in Computer Science & Engineering

Graduated: 2016 | 77.14%

New Horizon College of Engineering
